YOUR CONFIGURATION

Dell™ XPS M1210

Ultimate Mobility

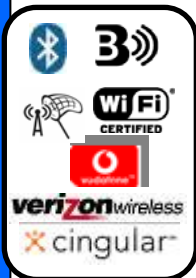

Previously Approved in AD#69967870

The Dell XPS M1210 is the smallest and lightest product in Dell's XPS portfolio. It is great mobile entertainment machine as defined by its dual-core processing power, optional 256MB discrete graphics and broad wireless options. This feature-rich mobility masterpiece is ideal for travelers, students or anyone needing above average power in an ultra-mobile form-factor.

EXTREME MOBILITY

- **12.1" widescreen display / Weight*: 4.37lbs/1.98kg**
Small, light weight form factor provides no compromise, high mobility computing including a full size keyboard. The XPS M1210 is ideal for tight places like an airplane tray table.
- **Great Wireless Connectivity**
Dell WiFi Catcher™ Conveniently finds wireless networks by simply sliding a switch without having to open your notebook, and wait to boot or resume. The same physical switch allows you to switch on/off wireless functionality at the airport, in the car, or on-the-go to help conserve battery life. Mobile Broadband can enable voice communication and web surfing on the go.*
- **Long battery life with extended use batteries**
Up to 7 hours 54 minutes of mobile use, using the optional 9-cell Lithium Ion battery*.
- **Sophisticated industrial design and Dell RoadReady™**
High quality metallic finishes and magnesium alloy materials deliver a light weight, durable, beautiful design; RoadReady™ delivers durable design and applies rigorous product testing procedures to deliver a dependable customer experience. Visit dell.com/roadready for more details.

On-The-Go Entertainment

- **Optional A/V Communications Package**
The A/V communications package includes an integrated 1.3 mega pixel web cam, one set of premium noise isolation ear buds, SKYPE™ voice over internet protocol software and an integrated mobile broadband antenna to be mobile broadband ready. The A/V Communications Package offers robust video chat capabilities. The noise isolation ear buds and directional microphone system helps reduce background noise for crisp, clear voice communications. The mobile broadband antenna enables mobile broadband connectivity for online entertainment and email via an optional cellular mini-card, anywhere you have cellular service.*

Camera Benefits:

- Bring your instant messaging chats to life by adding video and voice.
 - Record videos and photos of family gatherings, business meetings and classroom lectures.
 - Share your memories instantly over e-mail, post them to a Web site or blog, or save them directly to your hard drive for future editing.
 - Personalize your video conversations with the included Logitech® Video Effects™. These animated 3D avatars imitate your facial expressions and head movements. Or choose 2D face accessories that you apply to your own image to change your look.
 - Make video conference calls over the internet to others who also have Skype™ video conferencing software.
 - A rotating lens allows you to capture yourself and others at the best possible angle.
- **Optional 256MB NVIDIA® GeForce™ Go 7400 TurboCache™***
Step up your game with powerful discrete graphics solutions.
 - **Next Generation Dell MediaDirect™**
Fast, easy, one-button access to movies, music, and photos without the need to start Windows!

Intel® Core™ Duo Processors

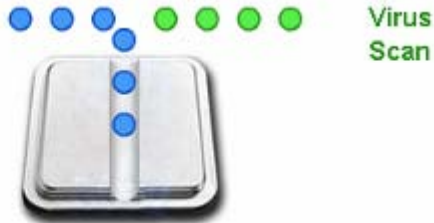

Accomplish more while running multiple applications, such as editing video while downloading music.

Intel® Core™ Solo processor (Single Core Technology)

Web Browser

Performance Level - +

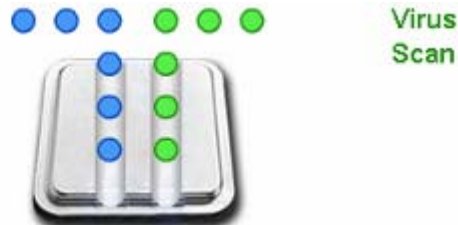

A single core processor performs one task at a time. For example, when surfing the web and a virus scan application begins your system may perform slower because the two programs are now fighting for processor time.

Intel® Core™ Duo processor (Dual Core Technology)

Video Editing

Performance Level - +

A dual core processor can run two programs simultaneously allowing maximum performance while running demanding applications, such as editing video while downloading music and/or running a virus scan.

A/V Communications Package

HELP SECURE YOUR NOTEBOOK – McAfee Security Center

Flexible and Comprehensive Protection

- In today's world, multiple layers of security software protection are essential in safeguarding computer data. Through regular use of scheduled virus scans, blocking hackers with a firewall, and safeguarding your sensitive information with privacy software, you can experience a high degree of data security as well as peace of mind.
- Only get the services you need with the McAfee Security Center with access to subscription services including:
- McAfee VirusScan Online - This industry-leading solution employs the same state-of-the-art virus detection and removal technology found on many corporate desktops.
- McAfee Personal Firewall Plus – Helps prevent hackers from accessing important personal and financial information, providing a comprehensive, multi-layered PC security solution when combined with VirusScan Online.
- McAfee Privacy Service - Stops the exploitation of personal information, blocks cookies and online ads, and helps protect children from accessing inappropriate content on the Internet.
- McAfee Security Center is offered as a 90-day introductory trial or an optional 15-month subscription

Note: For maximum effectiveness against computer viruses, hackers and privacy theft, software updates, upgrades and virus definitions must be updated on a regular basis. This is most easily accomplished through the use of long-term subscription upgrades. Dell strongly recommends that customers extend their security software subscription. For customers who stay with the 90-day trial, they will be notified in 90 days that their complimentary subscriptions are about to expire: at that time, they can renew their subscriptions online for one year, ensuring continued protection.

PC Security Customer Education Campaign

Dell is committed to helping our customers get the most out of the technology they own and providing them with tools to guard against unwanted programs like worms, viruses and spyware.

As consumers' No. 1 PC technology partner, Dell wants to help our customers get secure.

In July 2004, Dell launched an aggressive PC Security awareness campaign to educate our customers about cyber threats, how to protect themselves, and what to do if they get infected. For more information, visit www.dell4me.com/security

Important Information

Pricing, specifications, availability, and terms of offers may change without notice. Taxes, fees, shipping, handling and any applicable restocking charges are extra, and vary. Dell cannot be responsible for pricing or other errors, and reserves the right to cancel orders arising from such errors.

- **4GB Memory:** The total amount of usable memory available will be less depending on the actual system configuration.
- **Integrated Graphics:** The total of local and shared system memory used by this graphics card is up to 256MB. Local on-board memory is 64MB. Up to 192MB of system memory is allocated to support graphics.
- **NVIDIA GeForce Go 7400 TurboCache*:** Up to 224 MB of system memory may be allocated to support graphics, depending on system memory size and other factors.
- **Hard Drive:** For hard drives, GB means 1 billion bytes and TB equals 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less. On Dimension, XPS, and Inspiron systems, for Norton Ghost 10 and Dell DataSafe users, up to 25% of the stated hard drive capacity may be utilized by your system as dedicated backup space.
- **DVD +/- RW:** Discs burned with this drive may not be compatible with some existing drives and players; using DVD+R media provides maximum compatibility.
- **System Weight:** Preliminary, still pending legal approval. Weights vary based on configuration, usage and manufacturing variability.
- **Mobile Broadband:** You must be a Vodafone™ subscriber. Actual connectivity is subject to wireless service provider's coverage area and may be affected by equipment, topography, signal strength, environmental considerations, and other factors. Service may vary significantly within buildings. Dell does not guarantee coverage.
- **Hot Spot Wireless Access:** Where wireless access is available. Additional access charges apply in some locations.
- **Media Center:** Media Center live TV functionality requires TV Tuner for PC and minimum notebook system requirements of Intel® Pentium® M 1.6GHz processor and 512MB RAM. May not be compatible with all cable systems and local broadcast signals. Recording TV in Media Center requires Internet connection for full functionality.
- **System Weight:** Weight shown is with a DVD/CD-RW Combo Drive and 6-cell Li-Ion battery. Weights vary depending on configurations and manufacturing variability.
- **Battery life (preliminary):** Actual battery life will vary based on configuration, usage and manufacturing variability. Preliminary battery life results based on MobileMark 2005 Battery Life benchmark test performed by Dell Labs on XPS M1210 in May, 2006. Testing performed on pre-production XPS M1210 with Intel Core Processor Duo T2300 (1.66GHz), 12.1" XGA LCD, 512MB DDR2 RAM, 40GB HDD, Windows MCE, Intel GMA 950 graphics, and 9-cell (85WHr) primary battery. Result ranged from 7 hours 31 minutes to 7 hours 54 minutes
- **TV Tuner:** Tuner requires Media Center Edition OS or third party software. MCE may not be compatible with all cable systems and local broadcast signals.
